📍 Himachal Pradesh

## Skills

### 🔗 AI & Machine Learning

Deep Learning, Neural Network(ANN  
RNN, CNN,LSTM), Transformers,  
Backpropagation

### 🔗 Machine Learning Algorithms

Linear Regression, Logistic Regression,  
Decision Tree, K-Nearest Neighbors(KNN),  
Random Forest, Support Vector Machine,  
Clustering(K-means)

### 🔗 Deep Learning framework

TensorFlow, Keras, OpenAI GPT Models,  
GENAI

### 🔗 Cloud & DevOps

AWS (Lambda, ECS, EKS, S3, Step  
Functions), GCP (GKE, Cloud Build), Azure  
(AKS, Azure OpenAI), Docker, Kubernetes

### 🔗 Databases

PostgreSQL, MongoDB, Redis

### 🔗 AI Red Teaming

Identify safety risks, Detect harmful  
or biased outputs, Test resistance to  
prompt injection and jailbreaks, Evaluate  
misinformation generation, Check privacy  
and data leakage risks, Improve reliability  
and trsutworthiness

### 🔗 Tools&Technologies

Streamlit, PowerBI, Tableau, Git, SQL,  
MySQL, Pandas, NumPy, Matplotlib, Seaborn,  
Opencv2

## Languages

English

Hindi

## Summary

Data Scientist(N1) with 1 year of Python expertise in backend development, agentic AI system design, LLM orchestration, and real-time platform engineering. Strong foundation in building scalable REST APIs, microservices, and data pipelines alongside Planner-Executor agents, RAG pipelines, and stateful multi-step workflows for enterprise-scale production systems. Hands-on with OpenAI, open-source LLMs, prompt engineering with structured outputs, and document/intake automation. Experienced in cloud-native deployments (AWS, GCP, Azure), enterprise system integration, and security-focused AI platforms.

## Education

|                                  |           |
|----------------------------------|-----------|
| Himachal Pradesh University(HPU) | BCA       |
| Sujanpur(HP)                     |           |
| Chandigarh University            | MCA(AIML) |
| Mohali(Punjab)                   |           |

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                     |
